Re: U.S. Patent No. 11,169,281 Based on Application No. 16/972,577
Title: **RADON SENSOR DEVICE USING POLYHEDRAL-SHAPED IONIZATION CHAMBER**
Applicant: FTLAB CO., LTD.
LM Ref.: 4016-1056
Your Ref.: NOP-2020-014US

Dear Sirs:

We are pleased to forward **U.S. Patent No. 11,169,281**, which issued on **November 9, 2021**. Please find the original Letters Patent enclosed. Please have the Inventors examine the patent for any errors or misspellings which may have occurred and kindly report the same to our offices, if a Request of Certificate of Correction is required.

Subject to any patent term adjustment recited on the face of the patent, the patent term expires on the earliest of a) twenty years from the application filing date, or b) twenty years from the earliest filing date of any continuation, divisional or international application designating the U.S. to which priority is claimed. Priority claims to provisional patent applications, foreign applications and international applications that do not designate the U.S. are not considered.

The term of the patent may also be extended due to internal Patent Office processing delays. In this case, the term has been extended **0 days** as indicated on the patent.

Please note that any article made or sold by the patentee under the patent may, under the Patent Codification Act of 1952, serve as a vehicle for giving notice of the patent to the public. The act provides that notice may be given that the article is patented by:

"either by affixing thereon the word "Patent" or the abbreviation "Pat." together with the number of the patent or when, from the character of the article, this cannot be done, by fixing to it, or to the packaging wherein one or more of them is contained, a label containing a like notice."

Failure to give such notice will result in the inability to recover damages in an action for infringement of the patent except on proof that the infringer was notified and continued to infringe thereafter. In such a case, damages may be collected only for infringement occurring after such notice was given.

Maintenance fees must be paid periodically, or the patent will lapse before the end of the term. In particular, maintenance fees are payable 3.5 years, 7.5 years, and 11.5 years from the date of issue. The maintenance fees can be paid with a surcharge within 6 months from the end of these periods. Enclosed herewith is a Maintenance Fee Schedule which list the due dates. We have docketed these due dates and will remind you as they draw near, but we recommend that you also place these dates on your docket.

Please note, we destroy paper file wrappers and associated correspondence files two years after the patent issue date. If you wish us to retain either of these files longer than two years, please advise us.

We ask that you kindly confirm receipt of this letter by either email or facsimile.

Sincerely,

LUCAS & MERCANTI, LLP
